Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 January 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 19-20, 25-26 and 31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Turunen(5,278,528).

Claims 19, 25 and 31, figure 4 discloses a communication device comprising a box with a wall(15) of the box carrying high frequency circuits and having a periodic structure(14) which filters undesired signals.

Claims 20 and 32, the wall(15) is an inside wall of the metallic box(fig. 3).

Claim 26, the periodic structure(14) comprises protrusions.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 21-24, 27-30 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Turunen in view of Okabe et al.(6,031,494).

Claims 21, 23, 27, 29, 33 and 35, figure 1 of Okabe discloses an antenna(3) formed in an opening of a box and connected to high frequency circuitry. A surface of the antenna(3) disclosed in Okabe is outside the box for improved antenna performance(abstract).

Claims 22, 24, 28, 30, 34 and 36, the back portion of the antenna(3) disclosed in figure 1 of Okabe which is mounted on the pcb would be inside the box(abstract) and a window(21) for passage of radio waves is provided on a wall of said box in the vicinity of the antenna(3).

It would have been obvious to one of ordinary skill in the art at the time of the invention to position an antenna as disclosed in Okabe in the device disclosed in Turunen for improved performance as disclosed in Okabe.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2821

6. Claims 19-36 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,337,661. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are recited in the claims of patent '661 but with different combinations of the limitations.

Claims 19-20, 25-26 and 31-32, see claims 1-2 of '661.

Claims 21-24, 27-30 and 33-36, see claims 5-6 of '661.

Information Disclosure Statement

7. The information disclosure statement filed April 17, 2002 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed because a copy of the documents listed in the OTHER DOCUMENTS sections were not found in the application. The IDS has been placed in the application file, but the information referred to in the OTHER DOCUMENTS section has not been considered.
